CAREER OBJECTIVE

I have spent my recent time building a solid baseline across the web ecosystem, mastering TypeScript, JavaScript, Next.js, Express.js/Node.js, and SQL-NoSQL databases. By building personal projects, I learned to seamlessly connect clean RESTful APIs with responsive user interfaces while managing schemas through Prisma-Postgresql. I am looking for my first full-time role as a Full Stack Software Engineer at AGNOS Digital Solution, where I can quickly adapt to your tech stack and write dependable code.

TECHNICAL SKILLS

- **Languages:** JavaScript (ES6+), TypeScript, SQL
- **Frontend:** NextJS, React.js, React Router, HTML5, CSS3, Tailwind CSS, Bootstrap, Shaden UI
- **Backend:** Node.js, Express.js, REST API, JWT Authentication, MongoDB, PostgreSQL, Prisma
- **Tools:** GitHub, Figma, Vercel
- **Exploring:** React Native, Redux, TanStack Query, Material-UI

PROJECTS

1. YourRENT (Property Rental Platform): [Live-Link](#) | [Backend-Code](#) | [Frontend-Code](#)

A full-stack rental management system with secure authentication, property filtering, and serverless optimization.

1. Core Features: Built JWT authentication with role-based access, interactive property search/filtering, and dynamic booking management.
2. Challenges & Fixes: Resolved Vercel serverless CORS preflight restrictions and optimized API request latency with token validation checks.
3. UI & Performance: Designed a mobile-responsive interface using NextJS and Tailwind CSS featuring custom pagination and state management.

Stack: NextJS • ExpressJS • TailwindCSS • Postgresql • Prisma • Typescript • JWT

2. MASIO (Apps Store): [Live-Link](#) | [Frontend-Code](#)

A responsive React.js application for discovering trending apps and experiencing a simulated installation workflow.

1. Feature: Browse trending apps with ratings/downloads and follow a demo installation process.
2. Challenge: Built reusable React components and dynamically rendered app data to reduce repetitive UI and maintain responsive layouts.
3. Goal: Simplify app discovery and demonstrate the installation journey in one interface.

Stack: ReactJS • Tailwind CSS • React Router • Recharts • React Toastify

3. Master Chefs (A recipe & Chef site): [Live-Link](#) | [Backend-Code](#) | [Frontend-Code](#)

A full-featured web-based task management system demonstrating core MERN development skills with authentication, CRUD operations, and responsive design.

1. Feature: Implemented user registration, login, and session-based task ownership so each user manages only their own data.
2. Only a logged in user can access specific section like recipe of a chef.
3. Designed a clean, mobile-responsive UI using Bootstrap 5; secured routes with JWT authentication

Stack: ReactJS • Bootstrap CSS • ExpressJS • React Router • JWT • MongoDB

QUALIFICATIONS

1. B. Sc (Engg.) in Computer Science and Engineering
 - Mawlana Bhashani Science and Technology University, Tangail
2. Next Level AI-Driven Software Engineering Bootcamp(L-2)
 - Programming Hero
3. Complete Web Development(L-1)
 - Programming Hero
