Hiring Manager
Gowappily Infotech

Re: Application for Full Stack Developer

Dear Hiring Manager,

I am writing to apply for the Full Stack Developer position at Gowappily Infotech. I hold a B.Sc. in Computer Science and Engineering from Mawlana Bhashani Science and Technology University and specialize in building modern, scalable web applications using React.js, Next.js, Node.js, TypeScript, and PostgreSQL.

Through my work on full-stack applications such as YourRENT and YourDelivery, I have implemented end-to-end features including role-based authentication, REST API architecture, database management with Prisma, and seamless digital payment integrations. For instance, on YourRENT, I built a multi-role rental marketplace using Next.js App Router, Express.js, and PostgreSQL, focusing on UI performance, typed API layers, and secure data workflows. My experience spans both client-side interactive components and server-side logic.

I am drawn to Gowappily Infotech's commitment to building innovative digital experiences and turning complex ideas into reality. My solid technical foundation and hands-on project experience align well with your team's goals, and I look forward to the opportunity to contribute to your web development projects.

Sincerely,

Abdullah Muhammad Siam
