Hiring Manager
Fyld
BELGIUM

Re: Application for Node.js Developer

Dear Hiring Manager,

I am writing to express my strong interest in the Node.js Developer position at Fyld. I hold a B.Sc. in Computer Science and Engineering from Mawlana Bhashani Science and Technology University and specialize in building reliable, scalable backend services using Node.js, Express.js, TypeScript, PostgreSQL, and MongoDB.

Through my work on production-grade projects like YourRENT and YourDelivery, I have implemented scalable server architectures and secure RESTful API integrations. On YourRENT, for instance, I engineered a backend service using Express.js, TypeScript, and PostgreSQL with Prisma ORM, featuring JWT authentication, route guards, typed service layers, and unit/E2E testing covering authentication flows. On YourDelivery, I designed MongoDB database schemas and managed role-based access control and payment workflows, focusing on clean architecture, asynchronous request handling, and query optimization. Additionally, I utilize Docker, Git, and Postman daily for containerization, version control, and API testing.

I am aligned with Fyld’s philosophy of building reliable software solutions that transform businesses. My strong technical foundation in server-side JavaScript/TypeScript, database management, and backend API engineering prepares me to contribute effectively to your development team, and I look forward to discussing how I can add value to your projects.

Sincerely,

Abdullah Muhammad Siam
