Hiring Manager
Green University of Bangladesh
NARATANGANJ

Re: Application for Web Developer

Dear Hiring Manager,

I am writing to express my strong interest in the Web Developer position at Green University Center for IT Services (GCITS), Green University of Bangladesh. I hold a B.Sc. in Computer Science and Engineering from Mawlana Bhashani Science and Technology University and specialize in executing full software development lifecycles (SDLC) to build performant, responsive web applications using React.js, JavaScript, HTML5, CSS3, REST APIs, and SQL databases.

Through my work on production-grade projects like YourRENT and YourDelivery, I have hands-on experience designing, maintaining, and debugging software applications. For instance, on YourRENT, I developed a full-stack rental marketplace using Next.js App Router, Express.js, and PostgreSQL, implementing typed service layers, RESTful API integrations, and unit/E2E testing for authentication workflows. On YourDelivery, I engineered intuitive customer and administrative dashboards, structured database workflows, and authored technical project documentation. Additionally, I utilize Git and GitHub daily to maintain clean code standards and efficient development workflows.

I admire Green University of Bangladesh's dedication to digital excellence in academic administration. My solid computer science foundation, full-stack project experience, and strong technical problem-solving skills prepare me to contribute effectively to GCITS, and I look forward to the opportunity to discuss how I can support your software development initiatives.

Sincerely,

Abdullah Muhammad Siam
