Hiring Manager
Headout
INDIA

Re: Application for Frontend Developer

Dear Hiring Manager,

I am writing to express my strong interest in the Frontend Engineer, Web (Frontend) position at Headout. I hold a B.Sc. in Computer Science and Engineering from Mawlana Bhashani Science and Technology University and specialize in building high-performance, responsive web applications using React.js, Next.js, TypeScript, JavaScript, and Tailwind CSS.

Through my work on end-to-end projects like YourRENT and YourDelivery, I have hands-on experience designing and delivering user-centric web features from scratch. On YourRENT, for instance, I built a mobile-first, dark-mode rental marketplace UI using Next.js App Router, TypeScript, and Tailwind CSS, implementing debounced property search filters, typed service layers, unit/E2E testing, and Stripe payment integration. On YourDelivery, I engineered client and administrative dashboards while consuming RESTful APIs to deliver seamless user interactions across devices. Furthermore, my full-stack background in Node.js and PostgreSQL allows me to collaborate effectively with backend developers.

I am inspired by Headout's mission to connect millions of users to real-world experiences globally. My solid technical foundation in React and TypeScript, passion for crafting delightful user experiences, and builder mindset prepare me to contribute effectively to your engineering team.

Sincerely,

Abdullah Muhammad Siam
