Hiring Manager
RentYard
DHAKA

Re: Application for Backend Developer Intern

Dear Hiring Manager,

I am writing to express my strong interest in the Backend Developer Intern position at RentYard. I hold a B.Sc. in Computer Science and Engineering from Mawlana Bhashani Science and Technology University and specialize in backend API development, database architecture, and core data structures and algorithms.

My background in competitive programming and algorithm practice on platforms like LeetCode has equipped me with strong problem-solving capabilities. In practical software development, I engineered the backend for YourRENT, a full-stack rental marketplace built with Express.js, TypeScript, and PostgreSQL with Prisma ORM. On this platform, I designed relational database schemas, structured RESTful API endpoints, implemented JWT authentication, and optimized data filtering logic. Additionally, on my YourDelivery courier platform, I structured MongoDB database workflows and managed role-based access controls for multi-user dashboards.

I am particularly excited about RentYard's mission in the real-world property rental domain, as it directly mirrors my personal project experience with rental software architecture. My solid DSA fundamentals, backend proficiency, and eagerness to learn prepare me to contribute effectively to your engineering team in Dhaka.

Sincerely,

Abdullah Muhammad Siam
