Hiring Manager
SNMatrix

Re: Application for React JS Developer

Dear Hiring Manager,

I am writing to express my strong interest in the React JS Developer position at SNMatrix. I hold a B.Sc. in Computer Science and Engineering from Mawlana Bhashani Science and Technology University and specialize in building modern, responsive, and user-friendly web applications using React.js, Next.js, JavaScript (ES6+), HTML5, CSS3, and Tailwind CSS.

Through my work on production-grade projects such as YourRENT and YourDelivery, I have hands-on experience developing intuitive client interfaces and managing frontend workflows. On YourRENT, for instance, I constructed a mobile-first, dark-mode rental marketplace UI using Next.js App Router, React, and Tailwind CSS, featuring debounced property search filters, typed service layers, and state management. On YourDelivery, I developed client and administrative dashboards while integrating RESTful APIs to ensure seamless cross-device performance. Additionally, I utilize Git and GitHub daily for version control and development collaboration.

I am excited about SNMatrix's innovative work culture and focus on developer growth. My solid technical foundation in React.js, practical component architecture experience, and eagerness to learn prepare me to contribute effectively to your development team.

Sincerely,

Abdullah Muhammad Siam
