Hiring Manager
AFI Digital Services

Re: Application for Full-Stack Developer

Dear Hiring Manager,

I am writing to express my strong interest in the Full-Stack Developer position at AFI Digital Services. I hold a B.Sc. in Computer Science and Engineering from Mawlana Bhashani Science and Technology University and specialize in building modern, scalable web applications using React.js, Next.js, TypeScript, Node.js, Express.js, and SQL/NoSQL databases.

Through my work on production-grade projects such as YourRENT and YourDelivery, I have hands-on experience taking full-stack features from technical design to delivery. On YourRENT, for instance, I engineered a multi-role rental marketplace using Next.js 16 App Router, Express.js, and PostgreSQL with Prisma ORM, featuring JWT authentication, route guards, typed service layers, and digital payment integrations. On YourDelivery, I developed client and administrative dashboards, structured MongoDB database workflows, and built RESTful API endpoints, prioritizing clean architecture and UI responsiveness.

I am excited about AFI Digital Services' on-site opportunity and collaborative office culture. My solid computer science foundation, hands-on full-stack project experience, and proactive problem-solving mindset prepare me to contribute effectively to your development team on-site.

Sincerely,

Abdullah Muhammad Siam
