Hiring Manager
Bangla Puzzle Limited

Re: Application for Frontend Developer

Dear Hiring Manager,

I am applying for the Intern, Frontend Developer position at Bangla Puzzle Limited. I have a B.Sc. background in Computer Science and Engineering and hands-on experience building responsive web applications using React, Next.js, TypeScript, JavaScript, and Tailwind CSS.

Through my projects, YourDelivery and YourRENT, I developed responsive, mobile-first interfaces, reusable components, and API-integrated features. I also implemented dynamic filtering, pagination, role-based dashboards, and optimized data-fetching workflows using TanStack Query. My experience with Figma, Git, and modern frontend tools has strengthened my ability to translate application requirements into functional user interfaces.

I am particularly interested in Bangla Puzzle Limited because of its work across diverse software and digital product development areas. I would welcome the opportunity to contribute my frontend skills, learn from experienced developers, and grow into a full-time engineering role through this internship.

Sincerely,

Abdullah Muhammad Siam
