Hiring Manager
GN Hearing

Re: Application for Frontend Engineer

Dear Hiring Manager,

I am writing to express my strong interest in the Frontend Engineer position supporting Jabra Enhance at GN Group. I hold a B.Sc. in Computer Science and Engineering from Mawlana Bhashani Science and Technology University and specialize in building accessible, intuitive, and performant web experiences using React.js, JavaScript, CSS, and Node.js.

Through my work on production-grade projects like YourRENT and YourDelivery, I have driven key web-based customer journeys from technical design to delivery. On YourRENT, for instance, I built a mobile-first, responsive user interface using Next.js App Router, React, and Tailwind CSS, featuring reusable component architecture, debounced property search filters, and optimized client-side state management. On YourDelivery, I engineered intuitive administrative and client dashboards while collaborating with backend APIs to ensure high application performance, cross-browser compatibility, and seamless user experiences.

I am inspired by GN Group's purpose of Bringing People Closer through innovative digital hearing solutions. My solid technical foundation in modern React tools, attention to usability, and collaborative problem-solving approach prepare me to contribute effectively to your Growth Engineering team.

Sincerely,

Abdullah Muhammad Siam
