Hiring Manager
GeminiSoft

Re: Application for Engineer Intern

Dear Hiring Manager,

I am applying for the Software Engineer Intern position at GeminiSoft. With a Computer Science and Engineering background and hands-on experience in React, Next.js, TypeScript, and Node.js, I have developed full-stack applications that demonstrate my ability to build practical web solutions.

Through my projects, YourDelivery and YourRENT, I implemented REST APIs, JWT authentication, PostgreSQL database operations, and role-based dashboards. I also integrated Stripe payments, developed responsive interfaces, and wrote unit and end-to-end tests. These projects strengthened my understanding of application architecture, API integration, and deployment workflows.

GeminiSoft's opportunity to contribute to live client projects while learning through mentorship and code reviews particularly interests me. I would welcome the opportunity to contribute my existing skills, learn from experienced engineers, and grow as a software developer within your team.

Sincerely,

Abdullah Muhammad Siam
