Hiring Manager
Hashcodex

Re: Application for Full Stack Developer

Dear Hiring Manager,

I am writing to express my strong interest in the Full Stack Developer position at Hashcodex. I hold a B.Sc. in Computer Science and Engineering from Mawlana Bhashani Science and Technology University and specialize in building modern, performant web applications using React.js, Vite.js, Next.js, Node.js, JavaScript, TypeScript, and SQL/NoSQL databases.

Through my work on production-grade projects such as YourRENT and YourDelivery, I have hands-on experience taking full-stack features from technical architecture to production deployment. On YourRENT, for instance, I engineered a multi-role rental marketplace using Next.js 16 App Router, Express.js, and PostgreSQL with Prisma ORM, featuring JWT authentication, route guards, typed service layers, and digital payment integrations. On YourDelivery, I built administrative and client dashboards using React and Vite, structured MongoDB database workflows, and developed secure RESTful API endpoints, prioritizing fast render times and clean architecture.

I am excited about Hashcodex's growth and focus on building high-quality software solutions. My complete technical alignment with your core stack, hands-on project experience, and solid computer science foundation prepare me to contribute effectively to your development team.

Sincerely,

Abdullah Muhammad Siam
