Hiring Manager
Helide Labs

Re: Application for Full Stack Developer Intern

Dear Hiring Manager,

I am writing to express my strong interest in the Full Stack Developer Intern position at Helide Labs. I hold a B.Sc. in Computer Science and Engineering from Mawlana Bhashani Science and Technology University and specialize in building modern, end-to-end web applications using React.js, Next.js, TypeScript, Node.js, Express.js, and SQL/NoSQL databases.

Through my work on projects like YourRENT and YourDelivery, I have hands-on experience building full-stack web applications from concept to deployment. On YourRENT, for instance, I engineered a multi-role rental marketplace using Next.js 16 App Router, Express.js, and PostgreSQL with Prisma ORM, featuring typed REST APIs, JWT authentication, debounced search filters, and Stripe payment processing. On YourDelivery, I built responsive client and administrative dashboards using React, structured MongoDB database models, integrated AI tools, and utilized Docker and Git for development and version control.

I am excited about Helide Labs' mission to build next-generation software solutions and foster developer growth. My complete technical alignment with both your core and preferred tech stack, along with my hands-on project experience, prepares me to contribute effectively to your development team from day one.

Sincerely,

Abdullah Muhammad Siam
