Hiring Manager
Matcha

Re: Application for Frontend Engineer

Dear Hiring Manager,

I am writing to express my strong interest in the Frontend Engineer position at Matcha. I hold a B.Sc. in Computer Science and Engineering from Mawlana Bhashani Science and Technology University and specialize in building fast, polished, and detail-oriented web interfaces using React.js, Next.js, TypeScript, JavaScript, and Tailwind CSS.

Through my work on production-grade projects like YourRENT and YourDelivery, I have driven end-to-end feature development with a keen eye for visual precision and performance. On YourRENT, for instance, I built a mobile-first, dark-mode rental marketplace UI using Next.js App Router, TypeScript, and Tailwind CSS, featuring debounced property search filters, typed service layers, and unit/E2E testing for core authentication workflows. On YourDelivery, I engineered scalable component architectures and administrative dashboards while collaborating with backend APIs to ensure cross-device consistency and smooth user experiences.

I am drawn to Matcha's calm, low-distraction culture, focus on design craftsmanship, and commitment to asynchronous ownership. My solid technical foundation in React and TypeScript, attention to detail, and autonomous builder mindset prepare me to contribute effectively to your remote engineering team.

Sincerely,

Abdullah Muhammad Siam
