Hiring Manager
Noustiq

Re: Application for Full Stack Developer

Dear Hiring Manager,

I am writing to express my strong interest in the Full Stack Developer position at Noustiq. I hold a B.Sc. in Computer Science and Engineering from Mawlana Bhashani Science and Technology University and specialize in building modern, scalable web applications, client portals, and administrative dashboards using React.js, Next.js, TypeScript, Node.js, Express.js, and PostgreSQL.

Through my work on production-grade projects like YourRENT and YourDelivery, I have hands-on experience owning features from concept to production. On YourRENT, for instance, I engineered a multi-role rental marketplace using Next.js 16 App Router, Express.js, and PostgreSQL with Prisma ORM, featuring typed REST APIs, role-based authentication, debounced search filters, and digital payment integrations. Additionally, my training in AI-driven software engineering workflows equips me with practical expertise in integrating AI/LLM APIs and building modern automation solutions.

I am excited about Noustiq's focus on building enterprise systems, AI agents, and business automation toolchains. My complete technical alignment with your core stack, product-focused mindset, and AI integration experience prepare me to contribute effectively to your engineering team.

Sincerely,

Abdullah Muhammad Siam
