Hiring Manager
Vegavid Technology

Re: Application for MERN STACK DEVELOPER

Dear Hiring Manager,

I am writing to express my strong interest in the MERN Stack Developer position at Vegavid Technology. I hold a B.Sc. in Computer Science and Engineering from Mawlana Bhashani Science and Technology University and specialize in building scalable, performant web applications using MongoDB, Express.js, React.js, Node.js, and TypeScript.

Through my work on production-grade projects like YourRENT and YourDelivery, I have driven end-to-end full-stack feature development. On YourRENT, for instance, I engineered a multi-role rental marketplace using Next.js App Router, Express.js, and PostgreSQL/MongoDB, featuring typed REST APIs, JWT authentication, debounced search filters, and Playwright test coverage. On YourDelivery, I built administrative dashboards, managed MongoDB database schemas, and integrated digital payment workflows while using Docker and Git to maintain clean development and deployment processes. Additionally, my background includes AI-driven software engineering tools, enabling me to adopt emerging technology stacks rapidly.

I am inspired by Vegavid Technology's innovative work across AI, Blockchain, and enterprise software solutions. My complete technical alignment with your MERN stack requirements, strong testing discipline, and solid computer science foundation prepare me to contribute effectively to your engineering team.

Sincerely,

Abdullah Muhammad Siam
