Hiring Manager
Motions Labs

Re: Application for MERN Stack Developer

Dear Hiring Manager,

I am writing to express my strong interest in the MERN Stack Developer Intern position at MotionLabs. I hold a B.Sc. in Computer Science and Engineering from Mawlana Bhashani Science and Technology University and specialize in developing scalable web applications using React.js, Next.js, Node.js, Express.js, and MongoDB.

Through my work on full-stack projects like YourDelivery and YourRENT, I have built end-to-end web applications featuring role-based access control, RESTful API integrations, responsive dashboards, and digital payment systems. For example, on YourRENT, I developed a multi-role rental marketplace using Next.js App Router, Express.js, and database management tools, prioritizing UI performance, typed service layers, and efficient data workflows. Additionally, my background includes AI-driven software engineering workflows, allowing me to build clean features rapidly.

I am excited about MotionLabs' mission to build scalable B2B SaaS products and AI-powered workflows. My solid MERN foundation and hands-on project experience align well with your team's goals, and I am ready to ship production-ready features from day one.END

Sincerely,

Abdullah Muhammad Siam
