Hiring Manager
Pi-Bi Technologies

Re: Application for Full Stack Developer Intern

Dear Hiring Manager,

I am writing to express my strong interest in the Full Stack Developer Intern position at Pi-Bi Technologies. I hold a B.Sc. in Computer Science and Engineering from Mawlana Bhashani Science and Technology University and specialize in building modern, end-to-end web applications using Next.js, React.js, TypeScript, REST APIs, and PostgreSQL.

Through my full-stack projects, including YourRENT and YourDelivery, I have hands-on experience across the entire development lifecycle. For example, on YourRENT, I developed a multi-role rental marketplace utilizing Next.js 16 App Router, Express.js, and PostgreSQL with Prisma ORM. I built responsive user interfaces, structured secure RESTful API endpoints, implemented debounced search filters, and integrated digital payment processing while using Git and GitHub for version control. On YourDelivery, I developed full CRUD features and managed database workflows for parcel tracking and user role permissions.

I am excited about Pi-Bi Technologies' mission of building real products and empowering developer growth. My strong technical alignment with your mandatory stack and practical project experience prepare me to contribute effectively to your team from day one.

Sincerely,

Abdullah Muhammad Siam
