Faheem Abbas
resume

Re: Application for Frontend Developer

Dear Faheem Abbas,

I am writing to express my strong interest in the Frontend Developer position for your long-term project. I hold a B.Sc. in Computer Science and Engineering from Mawlana Bhashani Science and Technology University and specialize in building modern, responsive, and user-friendly web interfaces using React.js, Next.js, JavaScript, and Tailwind CSS.

Through my full-stack projects, including YourRENT and YourDelivery, I have extensively translated design wireframes into clean, functional component architectures while integrating backend RESTful APIs. For instance, on YourRENT, I developed a mobile-first, dark-mode user interface with debounced filters and a typed service layer that streamlined frontend API communication. Additionally, I use Git and GitHub daily to maintain version control, ensure clean code structure, and manage project workflows.

I am eager to contribute my frontend expertise, component design skills, and strong work ethic to your development team. My technical foundation and project-building experience align well with your project goals, and I look forward to the opportunity to discuss how I can add value to your team.

Sincerely,

Abdullah Muhammad Siam
