Hiring Manager
Bangla Puzzle Limited

Re: Application for Frontend Developer

Dear Hiring Manager,

I am writing to apply for the Intern, Frontend Developer position at Bangla Puzzle Limited. I hold a B.Sc. (Engg.) in Computer Science and Engineering and have practical frontend development experience using React, Next.js, TypeScript, JavaScript, and Tailwind CSS. I enjoy building responsive, user-friendly interfaces and translating design concepts into functional web applications.

Through my personal projects, YourRENT and YourDelivery, I have developed responsive dashboards, reusable React components, interactive interfaces, and API-integrated features. These projects have strengthened my understanding of frontend architecture, responsive design, debugging, and maintainable code.

I am excited about the opportunity to learn from your development team and contribute to real-world software projects. I would welcome the chance to demonstrate my technical abilities, improve my development skills, and grow into a permanent frontend developer through this internship.

Sincerely,

Abdullah Muhammad Siam
