Hiring Manager
Bangladesh Software Development Ltd

Re: Application for Junior Software Engineer

Dear Hiring Manager,

I am writing to apply for the Junior Software Engineer (Fresher) position at Bangladesh Software Development Ltd. (BSD). I hold a B.Sc. (Engg.) in Computer Science and Engineering and have developed practical full-stack development skills through personal projects using JavaScript, TypeScript, React, Next.js, Node.js, and PostgreSQL.

Through projects such as YourDelivery, a courier management platform, and YourRENT, a property rental platform, I have worked on REST APIs, JWT authentication, role-based access control, database design, payment integration, and multi-role business workflows. These experiences have helped me understand how to translate requirements into functional software while debugging problems and maintaining structured code.

I am particularly interested in BSD's emphasis on analytical thinking, AI-assisted development, and continuous learning. I am eager to contribute my existing skills, adapt to new technologies such as Laravel when required, and grow as a responsible software engineer within your team.

Sincerely,

Abdullah Muhammad Siam
