Hiring Manager
Delco IT

Re: Application for Website Developer

Dear Hiring Manager,

I am writing to apply for the Website Developer position at Delco IT. I hold a B.Sc. (Engg.) in Computer Science and Engineering and have practical experience developing responsive web applications using React, Next.js, TypeScript, JavaScript, and Tailwind CSS. I enjoy transforming design concepts into functional, visually consistent interfaces.

Through my personal projects, YourRENT and YourDelivery, I have developed responsive dashboards, reusable UI components, mobile-first layouts, and interactive application features. My experience includes implementing property filtering, pagination, authentication interfaces, API integrations, and multi-role dashboards. These projects have strengthened my understanding of responsive design, usability, debugging, and maintainable frontend development.

I am particularly interested in the opportunity to work on international projects and collaborate with your creative team. I would welcome the opportunity to contribute my frontend development skills, attention to detail, and willingness to learn while growing as a developer at Delco IT.

Sincerely,

Abdullah Muhammad Siam
