Hiring Manager
Heavy Task

Re: Application for AI-Assisted Web App Developer

Dear Hiring Manager,

I am writing to express my interest in the AI-Assisted Web App Developer Intern position. I hold a B.Sc. in Computer Science and Engineering and have practical experience developing full-stack applications using Next.js, React, TypeScript, Node.js, and PostgreSQL. I am particularly interested in how AI-assisted development can accelerate product development while maintaining code quality.

Through my projects, YourDelivery and YourRENT, I have built responsive interfaces, REST APIs, JWT authentication, role-based dashboards, database integrations, and Stripe payment functionality. I have also worked with Tailwind CSS, shadcn/ui, Prisma, and Vercel deployment. My experience provides a solid foundation for learning Supabase, AI integrations, and modern AI-powered development workflows.

I am eager to work on real-world products, learn from experienced engineers, and contribute to a fast-paced development environment. I would welcome the opportunity to bring my technical foundation, problem-solving skills, and enthusiasm for AI-powered software development to your team.

Sincerely,

Abdullah Muhammad Siam
