Hiring Manager
InnovexAI

Re: Application for Junior Full-Stack Developer

Dear Hiring Manager,

I am writing to express my interest in the Junior Full-Stack Developer position at InnovexAI. I hold a B.Sc. in Computer Science and Engineering and have practical experience developing full-stack web applications using React.js, Next.js, TypeScript, Node.js, and PostgreSQL.

Through my projects, YourDelivery and YourRENT, I have developed responsive interfaces, REST APIs, JWT authentication, role-based dashboards, database integrations, and Stripe payment functionality. These projects have strengthened my understanding of frontend development, backend services, database management, and application architecture. I am also interested in using AI-assisted development tools responsibly to improve productivity while maintaining code quality.

I would welcome the opportunity to contribute my technical skills, problem-solving abilities, and willingness to learn to InnovexAI. I am comfortable discussing the role's technical expectations and working arrangements.

Sincerely,

Abdullah Muhammad Siam
