Hiring Manager
Orissa Doot Placements

Re: Application for MERN Stack Developer

Dear Hiring Manager,

I am writing to apply for the MERN Stack Developer position advertised by Orissa Doot Placements. I hold a B.Sc. (Engg.) in Computer Science and Engineering and have practical full-stack development experience using MongoDB, Express.js, React, Node.js, JavaScript, and TypeScript.

Through my personal projects, YourDelivery and YourRENT, I have developed full-stack applications involving REST APIs, JWT authentication, role-based access control, database management, and payment integration. These projects have strengthened my ability to build responsive interfaces, implement backend functionality, troubleshoot issues, and organize maintainable application code.

I am enthusiastic about contributing to real-world web development projects and expanding my engineering capabilities. I would welcome the opportunity to demonstrate my technical skills, take ownership of development tasks, and grow as a MERN Stack Developer within your team.

Sincerely,

Abdullah Muhammad Siam
