KHULNA

Re: Application for Webflow Developer (AI-Focused)

Dear Hiring Manager,

I am interested in the Webflow Developer (AI-Focused) position at Pixeliio. I have a Computer Science and Engineering background with hands-on frontend development experience using HTML, CSS, JavaScript, React, Next.js, and Tailwind CSS.

Through my projects, YourDelivery and YourRENT, I developed responsive, mobile-first interfaces and translated design requirements into functional web applications. I also have experience working with Figma and have completed a Next Level AI-Driven Software Engineering Bootcamp, which strengthened my interest in AI-assisted development practices.

Pixeliio's focus on website templates, design quality, and AI-powered workflows interests me. I would welcome the opportunity to apply my existing frontend skills while developing practical expertise in Webflow and other visual website development platforms. I am eager to learn and contribute to your remote team.

Sincerely,

Abdullah Muhammad Siam
